

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	03 October 2022
Team ID	PNT2022TMIDxxxxxx
Project Name	Project - xxx
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through Gmail Registration through LinkedIn
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	Business Requirements	A common functional requirements involves the requirements that a company needs to operate.
FR-4	Administrative Protocols	Administrative Protocols allows software to perform Administrative Protocols, which are routine operations for a system.
FR-5	Authentication	Authentication ensures that users validate their identity before performing certain software requirements
FR-6	Legal Requirements	Some industries require companies to follow regulations and meet requirements for their software systems.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	A common non - functionality requirements involves specific features that help users operate software.
NFR-2	Security	Non - functionality security features involve adding protocols to protect valuable data.
NFR-3	Reliability	A common non - functional requirements involves features that analyze and increase the system's reliability
NFR-4	Performance	Users may install non functional requirements that enhance the overall performance of their system.
NFR-5	Availability	An operating system translates all foreign messages to the languages of the system's current location.
NFR-6	Scalability	Scalability is a feature that companies may add when receiving large amounts of data that needs to be saved in their system
